MEMORANDUM TO: Advisor for Management, ICAPS

SUBJECT: Draft Memorandum on Subject of "Development of Personnel Procurement and External Research Programs Through Exploitation of American Institutional Possibilities"

The following comments are submitted re the subject draft:

1. It is recommended that the draft be changed to omit the "reference" and to insert an opening paragraph which states a broad policy from which the rest of the paper can follow logically.

2. A proposed opening paragraph follows:

"In order that CIG may carry out its intelligence mission related to the national security it is essential that all means available, consistent with security, be utilized for the development of the intelligence program. This policy requires the exploitation by CIG of resources and facilities which are not available within the existing Federal establishment."

3. The opening sentence of old paragraph 1, which now becomes paragraph 2, could then be reworded as follows:

"Specific activities for consideration under the above policy include CIG support for:", etc.
